

CommonWell at HIMSS24 – Interoperability Showcase

CommonWell Health Alliance is a not-for-profit trade association devoted to the simple vision that **health data should be available to individuals and caregivers regardless of where care occurs**. Additionally, access to this data must be built into health IT at a reasonable cost for use by a broad range of health care providers and the people they serve.

At CommonWell, together with our service provider and members, we have **created and deployed a vendor-neutral platform that breaks down the technological and process barriers** that inhibit effective health data exchange. We aren't looking to reinvent the wheel; rather, we are leveraging existing standards and policies in order to **enable scalable, secure and reliable interoperability** as easily as possible for our members and their customers across the nation.

CommonWell is comprised of more than 70 health IT organizations today. Learn more about connected organizations on our website: www.commonwellalliance.org

Meet Linda

Linda Patterson is a 66-year-old retired woman living in Orlando, Florida. She has mild hypertension but sees her cardiologist when she experiences some chest discomfort and shortness of breath during exercise. After having a cardiac catheterization, Linda has open-heart surgery.

Linda's providers leverage their EHR and digital health solutions to exchange her clinical data seamlessly throughout each stop in her healthcare journey.

Additionally, Linda can use an application on her phone, powered by individual access services (IAS), to obtain her own clinical data and play a key role in managing her own care.

Interoperability Showcase Demonstration Schedule

Check out each of the demonstrations in the CommonWell booth and the CommonWell Thought Leadership Presentation titled *National Network leverages a MPI and RLS to achieve scalable interoperability*.

Clinical Demonstration

- Linda Patterson, 66-year-old woman undergoes cardiac catheterization and open-heart surgery
- Linda’s providers use the CommonWell network to stay apprised of her medical care across different systems
- She also leverages individual access services (IAS) vendor to obtain her own medical information using an application of her choice

Core Services Demonstration

- Complementary to the clinical demo, take a deeper dive into the core services that CommonWell offers – Master Person Index (MPI), Record Locator Service (RLS) and Data Broker
- Learn how these systems work together to streamline clinical data exchange across multiple, disparate health care settings

Learn More About CommonWell

- Dedicated time to stop by, ask questions, and chat with the CommonWell team and participating members about the network and services
